“...one of contemporary jazz's great performers...” so reads the prestigious Guardian newspaper's assessment of English **pianist John Taylor**. As house pianist at London's legendary Ronny Scott's jazz club, Taylor accompanied many of the icons of jazz, and in so doing honed his individual style into what became one of the most important voices on the European jazz scene. The gigs and recordings of his own groups, his long-time association with trumpeter Kenny Wheeler, his many ECM trio recordings with Peter Erskine and Palle Danielson and groups lead by the likes of Jan Garbarek and John Surman established Taylor's importance. Taylor's 1973 MPS trio album *Decipher* features two top players, **bassist Chris Laurence** and **drummer Tony Levin**, who perfectly compliment Taylor's wide-ranging style on an album that offers the listener a delicious taste of his compositions. The virtuoso sprint of “Cipher” melds into the varying tempos and emotions of “Wait For Me”, whereas “Leaping” is a pointillist abstract exchange between the three. The emotive jazz waltz “Speak to Me” plays some magical slight-of-hand with the time, and “Song For a Child” sings out as a soft-spoken ballad. “White Magic” powers through as a hard-swinging elixir for all that ails. Taylor's second album as leader presents a master composer/player at full maturity – what a joy that this music is available once again.

MPS Releases Fall 2017

The MPS reissue series kicks off in the fall of 2017 with an attractive 'five-pack' of artists who have been central to this label; milestones, rediscoveries and new discoveries, as well as rare and much sought-after pieces are hidden within the recordings from the years 1967 through 1973, with the halcyon (golden) year 1971 smack dab in the middle. The music covers a wide range of styles and formats, ranging from piano masterpieces to vocal jazz on through to filigree guitar work.

On the album "In Tune", a cappella vocal jazz meets up with elaborate keyboard play, as Oscar Peterson joins forces with the vocal architects from Chicago, The Singers Unlimited. A refined dialogue between two musical poles unfolds in a panoply of swinging cooperation, nostalgic, dreamy moments and Brazilian excursions. This 1971 recording was The Singers Unlimited's first album for MPS, and the beginning of a fruitful partnership that had initially come about at the recommendation of Peterson himself.

The musical journey moves on from the Canadian piano giant to his Jamaican colleague, Monty Alexander, who made his MPS debut in the same year with "Here Comes The Sun". Monty steps up with his quartet (bassist Eugene Wright, percussionist Montego Joe, drummer Duff Jackson) and offers up a superb repertoire ranging from a Beatles classic to blues and Latin-hued compositions on through to bebop-flavored pieces and a rock-saturated version of Miles Davis' "So What".

Englishman John Taylor represents the third voice of piano-centered jazz. With this reissue of "Decipher", an album that has long been off the market is available once again. For years Taylor was featured as the house pianist at Ronnie Scott's, London's legendary Jazzclub. First released in 1973, the album also boasts bassist Chris Laurence and drummer Tony Levin. "Decipher" offers a deep insight into Taylor's compositional abilities; virtuoso runs, abstract tonalities with pointillist strokes, an emotive jazz waltz and a soft-spoken ballad mark the trio's diversity and Taylor's emotive world.

Likewise, fans have longed for the re-release of Volker Kriegel's "Spectrum". In a thrilling rollercoaster ride, Kriegel's second album under his own name portrays the diverse qualities of the guitarist who at that time was the enfant terrible of the German and European jazz scene. The album captures an unusually broad stylistic range, as sitar rock, folksy lyricism, and a rondo shot through with free jazz alternate, while silky-smooth guitar runs, grooving percussion, and fluorescent Electra piano lines color the nuanced sound of this 1971 album.

Vocalist Mark Murphy, who died in 2015, was voted Male Vocalist of the Year four times by Downbeat. Early on in his eventful career, he created a musical bridge between America and the Old World that he later renewed by recordings with the likes of German trumpet phenom Till Brönner. Recorded in 1967, "Midnight Mood" stood in the middle of his European decade, a brilliant moment in his long musical journey. Surrounded by eight musicians from the famed Kenny Clarke/Francy Boland Big Band, Murphy performs persuasive adaptations of Ellington, luxuriates in the grandeur of Sinatra, steps in with a nonchalant Hispanic flair, and sounds the depths of dark sensuality and romantic ardor.
